Experience

Node Js Developer | IQ Setters, Noida

 August 2025 - Present

- Developed a **production-grade multi-process REST API** using **Node.js**, **TypeScript**, and **Express.js** with **3 concurrent server processes** (API, Socket.IO, BullMQ Worker) serving 100+ real users.
- Integrated **Razorpay Payment Gateway** with **HMAC webhook verification**, wallet-based fee processing, and **commission-split logic** — leveraged **MongoDB ACID transactions** across 5+ collections ensuring zero data inconsistency in payment, enrollment, and automated refund operations.
- Implemented **JWT-based RBAC** across **5 user roles**, **Zod validation** on 100% of API endpoints, **bcrypt hashing**, **OTP verification** maintaining **enterprise-grade code quality**

MERN STACK Development Trainee | Jspider, Noida

 Jan 2025 - July 2025

- Analyzed understanding of a production-ready Node.js Template in **TypeScript**, focusing on **architecture**, **modularization**, and scalability principles.
- Implemented **session-based authentication**, leveraging both **session** and **cookie-based** mechanisms to manage distinct user sessions securely.
- Developed a fully functional Bubble Shooter game with 150+ lines of JavaScript, achieving 95% accuracy in bubble matching and score tracking.

Projects

WarmBite, food delivery website | Node, Express

- Developed backend APIs using Express.js, improving server response times by 30% and handling 500+ orders/day and 10,000 API calls more efficiently.
- Implemented **JWT authentication** and **Bcrypt.js**, boosting **security by 40%** and reducing **unauthorized access by 70%**.
- Integrated **Stripe SDK** for payments, reducing transaction failures by 15%, optimized MongoDB Atlas for 50% faster queries, and used Cloudinary to cut **image load times by 25%**.

Sandesh, Real time chat | Node, Express, Socket.io - Web Application

- Built **real-time messaging** with **Socket.io**, reducing message latency by 40% and enabling instant private/group chats with live updates for users.
- Implemented **group creation** features, improving user engagement with **100+ active groups**, and stored data securely in **MongoDB Atlas**, optimizing query responses by **50%**.
- Developed secure user authentication with **JWT** and **Bcrypt.js**, improving login security by **40%**, and integrated **Cloudinary** for profile image uploads, reducing image load times by **25%**

Skills

- **Back-End** : Node Js, Express
- **Front Development**: JavaScript(ES6+), React Js, CSS 3, HTML 5
- **Databases**: NoSQL-MongoDB, SQL-Postgres
- **Programming Language**: JavaScript, C++
- **Tools & Platform**: VS Code, Postman, Git, GitHub

Achievements

- Showcased technical solutions at Prayog **2.0 TechFest**, engaging in **cross-domain** challenges with **industry-level judging**.
- **5-star** in Problem Solving at **Hackerrnak**
- Solved **200+** questions using **C++/Data Structure**

Education

- **MIMIT MALOUT** - I. K. Gujral Punjab Technical University, Kapurathala
(**B.Tech** in **CSE**)

2021 - 2025
